Patents Act 1990

No.
733963

STANDARD PATENT

I, Vivienne Joyce Thom, Commissioner of Patents, grant a Standard Patent with the following particulars:

Name and Address of Patentee:

Acres Gaming, Inc., 7115 Amigo Street Suite 150 Las Vegas, Nevada 89119 United States Of America

Names of Actual Inventors: John Acres; Alec Ginsburg and David Wiebenson

Title of Invention: Method of operating networked gaming devices, and a card reader

Application Number: 74161/98

Term of Letters Patent: Twenty years commencing on 26 July 1995

Divisional of: 697582 686824

Dated this 13 day of September 2001

V. Thom

ABSTRACT OF THE DISCLOSURE

5 A system for monitoring and configuring gaming devices interconnected over a high-speed network is disclosed. The system can support a file server, one or more floor controllers, one or more pit terminals, and other terminals all interconnected over the network. Each gaming device includes an electronic module which allows the gaming
10 device to communicate with a floor controller over a current loop network. The electronic module includes a player tracking module and a data communication node. The player tracking module includes a card reader for detecting a player tracking card inserted therein which identifies the player. The data communication node communicates with both the floor
15 controller and the gaming device. The data communication node communicates with the gaming device over a serial interface through which the data communication node transmits reconfiguration commands. The gaming device reconfigures its payout schedule responsive to the reconfiguration commands to provide a variety of
20 promotional bonuses such as multiple jackpot bonuses, mystery jackpot bonuses, progressive jackpot bonuses, or player specific bonuses.
